

# Alfalfa Studies by Stukenholtz Laboratories, Inc.

- Two replicated alfalfa trials were conducted by Stukenholtz Laboratories, Inc. in Idaho in 1997. Both trials showed remarkably improved yields.

- Treated plots at the Eden location yielded 17.8% higher. At Rupert the treated plot exceeded controls by 30%.

- Treatments included 40 lbs. of Agri-Plus in the early spring plus two applications of 1 gallons each of Quantum-H.
